Povzetek

Namen naše naloge je bil, da bi v Trbovljah raziskale povezavo med vodo, industrijsko kulturno dediščino in turizmom. Poleg teoretičnega dela in raziskave smo v nalogi opredelile tudi vizije, ki bi naše mesto turistično obogatilo prav prek naših raziskovalnih pojmov (voda, industrijska in kulturna dediščina). Pri raziskavi smo uporabile več pristopov, in sicer: intervju, anketo, raziskovanje na terenu in pridobivanje podatkov preko literature. Vse to nas je spodbudilo tudi k iskanju lastnih idej. Naša ciljna skupina anketirancev so bili devetošolci in učitelji, pri raziskavi pa smo intervjuvale še različne strokovnjake iz našega raziskovalnega področja, ki delujejo v številnih društvih in lokalni skupnosti. Trbovlje ima veliko potenciala, ki ga je potrebno izkoristiti, saj smo poleg zanimivih aktivnosti, ki jih mesto Trbovlje že ponuja turistu, v raziskovalni nalogi razmišljali še o nekaterih drugih možnostih, če bi bili vzpostavljeni pogoji za to. Naši hipotezi se sicer nista potrdili, spoznali pa smo, da je potrebno ozaveščati ljudi, iskati ideje in možnosti za udejanjanje le-teh. Trbovlje vidimo kot mesto, ki ga je potrebno izkoristiti in ga na zemljevid turistične ponudbe tudi zapisati kot kraj sprostitve in počitka.

Ključne besede: turizem, vpliv vode, mesto Trbovlje, sprostitvev, industrijska in kulturna dediščina

Abstract

The goal of our research assignment was to look into the connection between water, industrial cultural heritage and tourism. In addition to the theoretical and research parts, we also defined our vision which would enrich our town tourism-wise, through the same concepts that were the focus of our research (water, industry, cultural heritage). Different approaches were used, such as: interview, questionnaire, field research, literature review; all of which inspired us to develop our own ideas. Our target group were ninth-graders and teachers. We also interviewed different groups of experts from our field of interest that work in various societies and the local community. Trbovlje has great potential which must be taken advantage of – along with all the interesting activities that Trbovlje has to offer to a tourist, we considered other options in our research, should the conditions for such ideas be met. Our hypotheses were not confirmed; however, we realized that we need to make people aware of these issues. We need to look for ideas and possible ways to realize them. We see Trbovlje as a town that has much to offer and we believe that it should be marked as a place of rest and relaxation on the tourist map.

Key words: tourism, influence of water, Trbovlje, relaxation, industrial and cultural heritage
